| WB 4303 | | |

§New purified seed source. Recent performance from commercial samples of TAM 304 is significantly reduced.

†Has shown vernalization issues in the southern tip of the Blacklands during mild winters.

Texas A&M AgriLife Extension, in collaboration with our wheat breeding program colleagues in Texas A&M AgriLife Research, offer this list of wheat varieties for producers. Wheat Picks are based on a minimum of three years of data (and at least two years for a 'Watch List' designation) over multiple locations. These wheat varieties are not strictly a list of recommended wheat grain varieties, but given the data, these are the wheat varieties we would choose to include on our farm. If you are planting other varieties, and you like them, continue to plant them, but consider trying one of these varieties on some of your acres, especially a variety that complements your other wheat's maturity and insect/disease resistances.

For further information, view Texas A&M AgriLife wheat info. at <http://varietytesting.tamu.edu/wheat> as well as the following individuals/Center websites:

- Central (Blacklands) & Northeast Texas: Dr. Clark Neely, State Extension Small Grains Specialist, College Station, (979) 862-1412, cbneely@tamu.edu
