

CATTLE CARE AND HANDLING TESTING GUIDLINES

- The test will consist of the following:

1. Written Tests that cover:

- a. Cattle Handling
- b. TCFA BQA Program.

Students will receive a written copy of the test and a moderator will read each question as well.

2. Skills tests consisting of three stations:

- a. Demonstration of proper implant techniques.
- b. Demonstrate proper IM injection including needle and syringe selection, dosage per location, and handling of pharmaceutical.
- c. Demonstrate proper Sub Q injection including needle and syringe selection, dosage, location, and handling of pharmaceutical.

3. Interview

Interviews will be conducted by people from the industry. Students are encouraged to bring a resume and come dressed appropriately.
