

# Wheel Loader Operation and Safety

1. **True or False:** It is acceptable to have passengers hanging on the railing or in bucket when driving a wheel loader/tractor.
2. **True or False:** When operating on a slope while empty, face the bucket uphill.
3. When driving on slopes you should do all the following except:
  - a) Drive straight up
  - b) Drive straight down
  - c) Drive across the slope
  - d) Keep the load low
4. When traveling on the jobsite which is the correct way to carry a load?
  - a) With the arms at full lift
  - b) With the arms at eye level
  - c) With the arms low
  - d) None of the above
5. **True or False:** Machines working near energized sources must be considered energized.
6. What is the proper way to dismount a wheeled loader or tractor?
  - a) Facing away from the machine
  - b) Facing towards the machine
  - c) Jump off
  - d) None of the above
7. **True or False:** It is not ok to drop tools or parts off the machine when working or making repairs.
8. **True or False:** The operator is not responsible for bystanders.
9. **True or False:** Before starting the machine, the operator should walk completely around the equipment.
10. **True or False:** It is never okay to let anyone in or near the pivot area of articulated machines.

## Answers are below :

1. **True or False:** It is acceptable to have passengers hanging on the railing or in bucket when driving a wheel loader/tractor.
2. **True or False:** When operating on a slope while empty, face the bucket uphill.
3. When driving on slopes you should do all the following except:
  - a) Drive straight up
  - b) Drive straight down
  - c) **Drive across the slope**
  - d) Keep the load low
4. When traveling on the jobsite which is the correct way to carry a load?
  - a) With the arms at full lift
  - b) With the arms at eye level
  - c) **With the arms low**
  - d) None of the above
5. **True or False:** Machines working near energized sources must be considered energized.
6. What is the proper way to dismount a wheeled loader or tractor?
  - a) Facing away from the machine
  - b) **Facing towards the machine**
  - c) Jump off
  - d) None of the above
7. **True or False:** It is not ok to drop tools or parts off the machine when working or making repairs.
8. **True or False:** The operator is not responsible for bystanders.
9. **True or False:** Before starting the machine, the operator should walk completely around the equipment.
10. **True or False:** It is never okay to let anyone in or near the pivot area of articulated machines.
